

## 10. TOWN OF FORT EDWARD

This jurisdictional annex to the Washington County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Fort Edward with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Fort Edward, describes who participated in the planning process, assesses Fort Edward's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

### 10.1 HAZARD MITIGATION PLANNING TEAM

The Town of Fort Edward identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Washington County HMP Planning Partnership and Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table A summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Planning Partnership meetings is included in Volume I.

Table A. Hazard Mitigation Planning Team

| Primary Point of Contact                                                                                                                                 | Alternate Point of Contact                                                                                                                          |

### 10.2.2 Community Profile

The Town of Fort Edward is in western Washington County, with its west town line defined by the Hudson River and the border of Saratoga County, New York. The Town contains the Village of Fort Edward and is home to the Washington County seat. The Village of Hudson Falls and Town of Kingsbury lie to the north, the Town of Argyle is to the east, and the Town of Greenwich lies to the south. The Town has a total area of 27.4 square miles. Significant waterways in the town include Old Champlain Creek, Dead Creek, Black House Creek, Slocum Creek, Moses Kill River, Frog Pond and the Hudson River, which is 13 miles long within the Town. There is also a pond along Route 4 in the Town. The Champlain Canal runs through the Town for approximately six miles.

According to the U.S. Census, the 2020 population for the Town of Fort Edward was 2,883 which makes up 4.7 percent of the county. Data from the 2022 American Community Survey indicates that 0.7 percent of the population is 5 years of age or younger, 30.6 percent is 65 years of age or older, 0.5 percent is non-English speaking, 4.3 percent is below the poverty threshold, and 16.2 percent is considered disabled.

## 10.3 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Fort Edward's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

Each jurisdiction has unique assets, vulnerabilities and overall risk. A multi-jurisdictional plan needs to identify every hazard (from the whole planning area). In hazard mitigation planning, risk is the potential for damage or loss when natural hazards interact with people or assets, as shown in the figure below. These assets may be buildings,

infrastructure or natural and cultural resources. A risk assessment is a robust, data-driven analysis. It explains what might happen. It also finds where the local jurisdiction is vulnerable to hazards.

Each community must describe how the selected hazards affect its jurisdiction. Some hazards will have similar effects across the area: extreme temperatures, windstorms, winter weather, drought, heavy rain, etc. Some have a smaller location and will vary based on geography. Multi-jurisdictional plans must explain these differences.

Risk is the relationship, or overlap, between hazards and community assets. The smaller the overlap, the lower the risk.

### 10.3.1 Hazard Area

The hazard area map below illustrates the probable hazard areas impacted within the Town, as shown in Figure 1. This map is based on the best available data at the time of the preparation of this plan and is adequate for planning purposes. The map is provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Fort Edward has significant exposure. It also shows the location of potential new development, where available.

Figure 1. Fort Edward FEMA Flood, Wildfire, and Earthquake Hazard Area Extent and Location

### 10.3.2 Previous Event History

The history of natural and non-natural hazard events in Fort Edward is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table C and Table D provide details on the loss and damage in Fort Edward during hazard events since the last hazard mitigation plan update.

Table C. Hazard Event History in Fort Edward

| Dates of Event                  | Event Type (Disaster Declaration) | Summary of Event                                                                                                                                                                                                                                                                                                                                                                                                                                   | Summary of Damage and Losses in Fort Edward                                                                                                                |
|---------------------------------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| January 20, 2020 - May 11, 2023 | Disease Outbreak (FEMA-DR-4480)   | The first confirmed case of the 2019 Novel Coronavirus (COVID-19) in the United States was reported on January 20, 2020. Washington County reported over 19,000 positive cases and more than 1,200 fatalities.                                                                                                                                                                                                                                     | Town abided by social distancing, masking mandates and work from home orders.                                                                              |
| August 10, 2020                 | Tornado                           | Scattered storms produced an EF1 tornado in Washington County. The tornado had 90 mph wind speeds, causing shingle and roof damage to homes and uprooting trees. The County had approximately \$75,000 in property damage and \$10,000 in crop damage.                                                                                                                                                                                             | A lot of trees fell on private property and roadways; a woman was trapped under a tree and highway responded. No damages or losses to Town owned property. |
| August 24, 2020                 | Heavy Rain and Flooding           | Scattered storms impacted parts of Washington County, bringing between four and six inches of rain. This led to 8 flooded roadways, 21 flooded structures, 1 water rescue, several cars partially submerged, and the Whitehall Junior-Senior High School being significantly damaged by the flood waters. Overall, 40 homes and 13 businesses or non-profit organizations sustained damage totaling approximately \$16 million in property damage. | Town lost the bottom of Glen Hill; culvert was upsized – no issues relating to the culvert yet.                                                            |

EM = Emergency Declaration (FEMA)

Table D. Hazard Event History below Declaration Threshold

| Event Date        | Estimated Property Damages | Estimated Injuries and Deaths | Description                                                                                                                                                                                                                                                                                                                                     | Summary of Damage and Losses in Fort Edward                                                 |
|-------------------|----------------------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| December 18, 2023 | \$20,000                   | 0                             | The Hudson River at Fort Edward rose above flood stage during the evening. The river rose to moderate flood stage overnight through the evening on December 19. This caused River Road in Northumberland to flood and water to flow over the concrete wall at the Fort Edward Yacht Basin with several homes nearby having water approach them. | Town sandbagged; sandbags were also offered to residents. No damages or losses to the Town. |

*Note: Only events below the FEMA declaration threshold as well as greater than or equal to \$20,000 in property damage and/or resulted in fatalities were included in the table.*

### 10.3.3 Critical Facilities

Table E. Critical Facilities Flood Vulnerability

| Name    | Type          | Vulnerability          |                          | Addressed by Proposed Action | Already Protected to 0.2% Flood Level (describe protections) |
|---------|---------------|------------------------|--------------------------|------------------------------|--------------------------------------------------------------|
|         |               | 1% Annual Chance Event | 0.2% Annual Chance Event |                              |                                                              |
| C180071 | Large Culvert | Y                      | Y                        | 2025-FortEdwardT-06          | -                                                            |
| C180095 | Large Culvert | Y                      | Y                        | 2025-FortEdwardT-06          | -                                                            |

*Source: Washington County 2024; HIFLD 2023, 2024; NYS Department of Environmental Conservation 2024; NYS GIS 2023*

In addition to critical facilities that are exposed to flooding, there are no dams or high hazard dams located within the Town of Fort Edward.

### 10.3.4 Local Hazard Impacts Assessment

Table F. Local Hazard Impacts Assessment

| Hazard Name         | Local Impacts                                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Dam Failure         | The Town may be impacted by any dam that is located upstream. Currently, the town is not concerned with dams within Washington County. |
| Earthquake          | No known impacts.                                                                                                                      |
| Extreme Temperature | Water districts have experienced freezing pipes; Town has thawed pipes for residents.                                                  |
| Flood               | See Previous Event History for impacts.                                                                                                |
| Severe Weather      | Downed trees and limbs fall on roadways, though the Town effectively manages this impact.                                              |

| Hazard Name           | Local Impacts                                       |
|-----------------------|-----------------------------------------------------|
| Severe Winter Weather | The Highway department clears roadways effectively. |
| Wildfire              | No known impacts.                                   |

### 10.3.5 Vulnerable Community Assets

Table G. Vulnerable Community Assets

| Community Asset                          | Hazard Impacts and Asset Vulnerabilities                                                                                                                                                          | Community Asset                       | Hazard Impacts and Asset Vulnerabilities                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Agriculture</b>                       | The Town has agriculture, though it has not been highly impacted. Some crops have been impacted by wind damage.                                                                                   | <b>Local Roads</b>                    | Plum Road culvert has been red flagged by the County- concern of collapsing.<br><br>Towpath Road culvert needs to be replaced. Entrance and exit of culvert pipe have been flagged by EHP which prevents it from being replaced.<br><br>North River Road- anytime Hudson River levels increase, there is an issue where water comes over the road. Culvert needs to be upsized. |
| <b>Airports</b>                          | Not applicable                                                                                                                                                                                    | <b>Major Employers</b>                | No known impacts                                                                                                                                                                                                                                                                                                                                                                |

| <b>Other</b>                                                                                                                             | Not applicable                                               | <b>Drinking Water Resources</b>              | <p>The northern end of the Town is served by a water district that receives its supply from Hudson Falls, which in turn sources its water from Queensbury. This regional connection provides treated water to residents in that area.</p> <p>Water District 2 is located south of the Village, where there is growing interest among residents in obtaining water hookups. However, the Town did not qualify for the necessary funding or approvals to expand the district. The cost of extending water service to this area is prohibitively high, making expansion financially challenging.</p> <p>The remaining residents throughout the Town rely on private wells for their water supply. Many have expressed concerns about water quality, particularly due to elevated sulfur content and high levels of iron, which can affect both taste and usability.</p> |

### 10.3.6 Dams

The table below includes all dams in the Town of Fort Edward. This dam data is sourced from NYSDEC's inventory of dams and lists selected attributes of each dam. The dam classification (high, medium or low) corresponds to dam hazard classifications:

- **Class A: Low Hazard** - Dam failure may cause relatively minor economic or environmental damage.
- **Class B: Intermediate Hazard** - Dam failure may cause significant economic or environmental damage, but loss of life is not expected. There are about 570 Intermediate Hazard dams in New York.
- **Class C: High Hazard** - Dam failure may cause loss of life or other severe consequences. There are about 427 High Hazard dams in New York.
- **Class D: No Hazard** - Dams which have failed or have been removed and no longer present a risk.

In 2019, the Federal Emergency Management Agency (FEMA) announced the High Hazard Potential Dam (HHPD) Rehabilitation Grant Program, which has the potential to enhance New York's Dam Safety Program by providing technical, planning, design, and construction assistance in the form of grants for rehabilitation of eligible High Hazard Potential Dams (Class C dams).

Class C, or High Hazard Potential dams, are attributed to any dam whose failure or mis-operation will cause loss of human life and significant property damage. However, dams with other Classifications may still present real and present risks to people and property.

Table H. Dams Located in the Municipality

| State ID        | Name | River Name | Owners | Owner Type | Purposes | Classification |
|-----------------|------|------------|--------|------------|----------|----------------|
| None Identified |      |            |        |            |          |                |

### 10.3.7 Hazard Ranking and Vulnerabilities

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. Mitigation actions were developed for all high-ranked hazards. For jurisdictions that do not have two or more high rankings, medium rankings that have associated actions can be considered as hazards of concern.

The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Impacts from a particular hazard may have decreased due to an implemented project or relocation of an asset that was previously at risk. Alternatively, risk may have increased because population has increased in a hazard prone area.

The Town elected to consider those hazards identified as medium that also contribute to flooding events.

Table I. Hazard Ranking

| Hazard Name           | Hazard Ranking in 2018 HMP | Frequency (2018 – present): Increased, Decreased, Stayed the Same | Impacts (2018 – present): Increased, Decreased, Stayed the Same | Description of frequency and impacts (2018 – present): | Future Events (present – 2030): Will Increase, Decrease, Stay the Same | Hazard Ranking |
|-----------------------|----------------------------|-------------------------------------------------------------------|-----------------------------------------------------------------|--------------------------------------------------------|------------------------------------------------------------------------|----------------|
| Dam Failure           | Not applicable             | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Low            |
| Earthquake            | Low*                       | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Low            |
| Extreme Temperature   | Not applicable             | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Low            |
| Flood                 | Medium*                    | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Medium         |
| Severe Weather        | Medium*                    | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Medium         |
| Severe Winter Weather | Medium*                    | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Medium         |
| Wildfire              | Medium*                    | Stay the same                                                     | Stay the same                                                   | -                                                      | Stay the same                                                          | Medium         |

Notes:

\*The municipality adjusted the overall hazard ranking during this update.

## 10.4 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table J through Table M.

### 10.4.1 Development and Permitting

Table J. Development and Permitting Capability

| Question | Answer |
|----------|--------|
|----------|--------|

|                                                                                                |                                                             |
|------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Does your municipality or the county issue building permits for development in your community? | Town does permitting                                        |
| What is your process for tracking building permits?                                            | Town clerk and code enforcement officer and computer system |
| Are permits tracked by hazard area? (For example, floodplain development permits.)             | Yes. Floodplain development permits                         |
| Does your community have a buildable land inventory? If yes, please describe.                  | There is available space for buildout within the Town.      |

Table K. Number of Building Permits for New Construction Issued Since the Previous HMP

|                     | New Construction Permits Issued |              |                                     |       |
|---------------------|---------------------------------|--------------|-------------------------------------|-------|
|                     | Single Family                   | Multi-Family | Other (commercial, mixed-use, etc.) | Total |
| <b>2019</b>         |                                 |              |                                     |       |
| Total Permits       | 3                               | 0            | 0                                   | 3     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |
| <b>2020</b>         |                                 |              |                                     |       |
| Total Permits       | 4                               | 0            | 0                                   | 4     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |
| <b>2021</b>         |                                 |              |                                     |       |
| Total Permits       | 3                               | 0            | 0                                   | 3     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |
| <b>2022</b>         |                                 |              |                                     |       |
| Total Permits       | 2                               | 0            | 0                                   | 2     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |
| <b>2023</b>         |                                 |              |                                     |       |
| Total Permits       | 6                               | 0            | 0                                   | 6     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |
| <b>2024</b>         |                                 |              |                                     |       |
| Total Permits       | 2                               | 0            | 0                                   | 2     |
| Permits within SFHA | 0                               | 0            | 0                                   | 0     |

SFHA = Special Flood Hazard Area (1% flood event)

Table L. Recent Major Development and Infrastructure from 2019 to 2024

| Property or Development Name | Type of Development | # of Units / Structures | Location (address and/or block and lot) | Known Hazard Zones | Description / Status of Development |
|------------------------------|---------------------|-------------------------|-----------------------------------------|--------------------|-------------------------------------|
| Highway Garage               | Garage              | 1                       | -                                       | None               | 2020                                |

Table M. Known or Anticipated Major Development and Infrastructure in the Next Five Years

| Property or Development Name | Type of Development | # of Units / Structures | Location (address and/or block and lot) | Known Hazard Zones* | Description / Status of Development |
|------------------------------|---------------------|-------------------------|-----------------------------------------|---------------------|-------------------------------------|
| Canal Side Energy Site       | -                   | -                       | -                                       | None                | Looking for industrial tenant       |

## 10.5 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table A is responsible for maintaining this information.

### 10.5.1 NFIP Statistics

Table N summarizes the NFIP policy and claim statistics for Fort Edward.

Table N. Fort Edward NFIP Summary of Policy and Claim Statistics

|                                                |              |
|------------------------------------------------|--------------|
| # Policies                                     | 9            |
| # Claims (Losses)                              | 8            |
| Total Loss Payments                            | \$144,158.20 |
| # Repetitive Loss Properties (NFIP definition) | 0            |
| # Repetitive Loss Properties (FMA definition)  | 0            |
| # Severe Repetitive Loss Properties            | 0            |

*NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.*

*FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.*

*Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.*

### 10.5.2 National Flood Insurance Program (NFIP) Flood Vulnerability Summary

The HMP Team provided information on participation in and continued compliance with the NFIP in the table below.

Table O. NFIP Summary

| NFIP Topic                                                                                                                                                              | Comments                                                    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Describe areas prone to flooding in your jurisdiction.                                                                                                                  | See table above                                             |
| Are areas of your community located in a floodplain (1% and .2%)? If yes, please describe.                                                                              | Yes, along waterways                                        |
| Who is the Community Floodplain Administrator (FPA)? Do they serve any roles other than FPA? Do they have adequate training and capacity for this role?                 | Town Supervisor                                             |
| What local department is responsible for floodplain management?                                                                                                         | Code Enforcement                                            |
| Are any certified floodplain managers on staff in your jurisdiction?                                                                                                    | No                                                          |
| What is the local law number or municipal code of your flood damage prevention ordinance?                                                                               | Chapter 54, Flood Damage Prevention                         |
| What is the date that your flood damage prevention ordinance was last amended?                                                                                          | August 10, 1987                                             |
| When was the latest effective Flood Insurance Rate Map (FIRM) adopted, if applicable?                                                                                   | Currently being updated                                     |
| Explain NFIP administration services (e.g., permit review, inspections, engineering capability, GIS, etc.)                                                              | Permit Review                                               |
| What are the barriers to running an effective NFIP program in your community, if any?                                                                                   | Training, Staffing and Funding                              |
| Does your floodplain management staff need any assistance or training to support its floodplain management program? If yes, what type of assistance/training is needed? | Localized training                                          |
| How do you make Substantial Damage determinations? What is the process to make sure these structures are brought into compliance?                                       | No process                                                  |
| How do you determine if proposed development on an existing structure would qualify as a substantial improvement?                                                       | Building Inspector                                          |
| How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?                                                                  | None                                                        |
| Does the community track the number of buildings in the floodplain? If so, how many structures are in special flood hazard area (SFHA)?                                 | Tracks via building permits now; unsure about total amount. |

| NFIP Topic                                                                                                                                                                                                                                                                                           | Comments                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| How many structures (residential and non-residential) are exposed to flood risk within the community outside of the regulatory maps?                                                                                                                                                                 | None                                                |
| Does the community maintain elevation records? If yes, please describe.                                                                                                                                                                                                                              | Town does not; County does                          |
| Describe any areas of flood risk with limited NFIP policy coverage.                                                                                                                                                                                                                                  | None                                                |
| How does the community teach property owners or other stakeholders about the importance flood insurance?                                                                                                                                                                                             | Property owner expresses interest through a bank.   |
| What digital sources (like the FEMA Map Service Center, National Flood Hazard Layer) or non-regulatory tools does your community use?                                                                                                                                                                | FEMA Map                                            |
| Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions? | Flood risk is considered in the permitting process. |
| When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?                                                                                                                                                                                                     | CAV: 12/08/2021<br>CAC: 8/03/16                     |
| Does your community plan to join the CRS program or is your community interested in improving your CRS classification?                                                                                                                                                                               | No                                                  |

## 10.6 JURISDICTIONAL CAPABILITY INVENTORY AND ASSESSMENT

The Town of Fort Edward conducted a comprehensive inventory and assessment of its existing capabilities, plans, programs, and policies that support the implementation of hazard mitigation strategies. As part of this process, the Hazard Mitigation Planning (HMP) Team conducted a detailed review of the Town's existing capabilities, comparing them against a comprehensive list of hazard mitigation-related capabilities. It is important to note that the absence of certain types of capabilities was not interpreted as a deficiency in local capabilities, but rather as a reflection of the Town's specific needs and context.

Volume I, *Chapter 13 Capability Assessment* and the *Capability Inventory and Assessment* section of the Washington County Jurisdictional Annex collectively outline the full range of capabilities available at the County level, which includes resources and programs that extend to and benefit the Town. For additional information on these shared resources and collaborative efforts, please refer to these resources.

The tables below provide a summary of jurisdictional-specific capabilities currently in effect that support hazard mitigation efforts. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Fort Edward to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

### 10.6.1 Planning and Regulatory Capability and Integration

Planning and regulatory capabilities are the plans, policies, codes, and ordinances that prevent and reduce the impacts of hazards.

#### Ordinances

Table P. Ordinances

| Capability Type                   | In Place in Municipality                                           | Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Responsible Department / Agency / Organization |
|-----------------------------------|--------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| Building Codes                    | Yes, Chapter 51, Fire Prevention and Building Code, March 27, 1989 | The purpose of chapter 51 is to provide the method for administration and enforcement of the New York State Uniform Fire Prevention and Building Code (hereinafter the "code") in the Town of Fort Edward and shall establish powers, duties and responsibilities in connection therewith.                                                                                                                                                                                                                                                                                                                          | Code Enforcement                               |
| Flood Damage Prevention Ordinance | Yes, Chapter 54, Flood Damage Prevention, August 10, 1987          | It is the purpose of chapter 54 to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: <ul style="list-style-type: none"><li>- Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities.</li><li>- Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.</li></ul> | Code Enforcement                               |

| Capability Type                     | In Place in Municipality                                                  | Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Responsible Department / Agency / Organization |

| Comprehensive Plan                              | Yes, Town of Fort Edwards Master Plan, 2018 | The Town Master Plan guides the public and private actions within the Town over a 10-year time span. The overall goal of the plan is to create balance of economic development, farmland, and open space. The plan contains the Town's identified goals and provides strategies through actions to achieve these goals. The plan also helps to guide decision-makers within the Town in decisions on protection of natural irreplaceable features and the need for development. | Planning Board                                 |
| County Emergency Preparedness Assessment (CEPA) | Yes                                         | County Emergency Preparedness Assessment, 2022                                                                                                                                                                                                                                                                                                                                                                                                                                  | County Emergency Management                    |

| Other                                                                                                                     | No                                                                                                       |

## 10.6.5 Hazard Capability Assessment

Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. The HMP Team ranked the local government's capability to address risks and impacts of each hazard based on the risk and capability assessments performed above.

- *Strong: Capacity exists and effectively manages the impacts of this hazard.*
- *Moderate: Capacity exists but is not used or needs some improvement.*
- *Weak: Capacity exists and needs substantial improvement*
- *None: Capacity does not exist.*
- *N/A: This hazard is not a risk to my community.*

Table U. Adaptive Capacity

| Hazard              | Strong, Moderate, Weak, None |
|---------------------|------------------------------|
| Dam Failure         | None                         |
| Earthquake          | Moderate                     |
| Extreme Temperature | Moderate                     |
| Flood               | Moderate                     |

|                       |          |
|-----------------------|----------|
| Severe Weather        | Moderate |
| Severe Winter Weather | Moderate |
| Wildfire              | Moderate |

## 10.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

### 10.7.1 Past Mitigation Action Status

The table below indicates progress on the Town's mitigation strategy identified in the 2018 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

Table V. Status of Previous Mitigation Actions

| T. Fort Edward-1 —Master Plan Update          |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                 |

| Action Location                               | Townwide                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                 |
| Summary of Original Problem                   | The Master Plan does not currently address hazard identification and risk assessment or mitigation goals. By not addressing hazards and risk in the master plan, it is uncertain if hazard assessment information will be incorporated into future land use and other elements of the master plan.                                                                                                                                                          |                                                                                                                                                                 |
| Summary of Solution (Project)                 | Use the results and guidance from the Hazard Mitigation Plan to steer future Master Plan updates to incorporate mitigation into the goals and objectives, as well as in future planning decisions. Additionally, integrating hazard mitigation into the master plan promotes collaboration between planners and emergency managers, ensuring that hazard assessment information is incorporated into future land use and other elements of the master plan. |                                                                                                                                                                 |

| <b>Action Location</b>                        | East Road                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                           |
| <b>Summary of Original Problem</b>            | Roads have washed out due to natural hazards in the past including: <ul style="list-style-type: none"><li>• East Road.</li><li>• Black House Road.</li><li>• Patterson Road.</li></ul> When they wash out, roads are closed which prevent vehicles accessing those areas of the town. This impacts the health and safety of residents as it prevents emergency personnel from getting to those residents in the event of an emergency. |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>          | Improve drainage by increasing the culvert sizes at sites where roads have washed out due to natural hazards in the past to meet 50-year storm requirements and reduce flooding overflow at East Road. By improving these sites reduces the potential of roadway flooding and washouts, allowing emergency personnel full access to the town in the event of an emergency.                                                             |                                                                                                                                           |

| <b>Summary of Original Problem</b>            | Staff members have not been formally trained on Floodplain Administration; therefore, they may not fully understand floodplain management in the State, county and town.                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>          | Send local Floodplain Administrator to County and State trainings and to complete certification programs with respect to floodplain management. Also provide continuing education and training to ensure code enforcement and proper inspections. Becoming certified in floodplain management lays the foundation for ensuring that highly qualified individuals are available to meet the challenge of breaking the damage cycle and stopping its negative drain on the nation's human, financial, and natural resources. |                                                                                                                                           |

| <b>Summary of Original Problem</b>            | At the time of this plan update, North River Road, East Road, and Woodward Road flooding during periods of rain. It is uncertain as to what needs to be done to alleviate the flooding along these roadways. When flooded, the roads need to be closed, impacted the continuity of operations for emergency and essential personnel.                                                                                                                                                                                       |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>          | Evaluate North River Road, East Road, and Woodward Road for flooding issues. Identify solutions to alleviate flooding and address those solutions. By identifying floodprone areas, the Town can gain a better of understanding on ways to protect properties from flood damage. Once protected, this will reduce or eliminate the damages caused by flooding.                                                                                                                                                             |                                                                                                                                           |

| <b>Summary of Original Problem</b>            | Slope failure at CR 46. Habitual slope stability issues compromise the south bound lanes at this location annually. The slope failures lead to road closures which impacts the continuity of operations of emergency and essential personnel in the town.                                                                                                     |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>          | Stabilize slope at CR 46 where south bound lanes are annually compromised. To do this, the town will use proper bank stabilization methods including planting vegetation on the slope and installing riprap. This project will reduce future losses to the roadway and hindrance to transportation system are greater than the cost to implement the project. |                                                                                                                                           |

|--------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Summary of Original Problem</b>                           | Roads have washed out due to natural hazards in the past including: <ul style="list-style-type: none"><li>• East Road.</li><li>• Black House Road.</li><li>• Patterson Road.</li></ul> When they wash out, roads are closed which prevent vehicles accessing those areas of the town. This impacts the health and safety of residents as it prevents emergency personnel from getting to those residents in the event of an emergency. |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>                         | Improve drainage by increasing the culvert sizes at sites where roads have washed out due to natural hazards in the past to meet 50-year storm requirements and reduce flooding overflow at East Road. By improving these sites reduces the potential of roadway flooding and washouts, allowing emergency personnel full access to the town in the event of an emergency.                                                             |                                                                                                                                           |

| <b>Action Location</b>                                       | Patterson Road                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                           |
| <b>Summary of Original Problem</b>                           | Roads have washed out due to natural hazards in the past including: <ul style="list-style-type: none"><li>• East Road.</li><li>• Black Horse Road.</li><li>• Patterson Road.</li></ul> When they wash out, roads are closed which prevent vehicles accessing those areas of the town. This impacts the health and safety of residents as it prevents emergency personnel from getting to those residents in the event of an emergency. |                                                                                                                                           |
| <b>Summary of Solution (Project)</b>                         | Improve drainage by increasing the culvert sizes at sites where roads have washed out due to natural hazards in the past to meet 50-year storm requirements and reduce flooding overflow at East Road. By improving these sites reduces the potential of roadway flooding and washouts, allowing emergency personnel full access to the town in the event of an emergency.                                                             |                                                                                                                                           |

|                                               |                                                                                                                                   |                                                                                                                              |

### 10.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table U, Fort Edward identified the following mitigation efforts completed since the last HMP:

- None Identified

Since the adoption of the County's first HMP, Fort Edward has made significant mitigation progress in the following areas:

- None Identified

### 10.7.3 Identified Issues

The Town of Fort Edward has identified the following vulnerabilities within their community for mitigation strategy development:

- Town-owned facilities lack back up power. These facilities are Town Hall and the new Highway Garage. Roads have washed out due to natural hazards in the past including East Road. When they wash out, roads are closed which prevent vehicles accessing those areas of the town. This impacts the health and safety of residents as it prevents emergency personnel from getting to those residents in the event of an emergency.
- Staff members have not been formally trained on Floodplain Administration; therefore, they may not fully understand floodplain management in the State, county and town.
- At the time of this plan update, North River Road, East Road, and Woodward Road flooding during periods of rain. It is uncertain as to what needs to be done to alleviate the flooding along these roadways. When flooded, the roads need to be closed, impacting the continuity of operations for emergency and essential personnel.
- Slope failure at County Route 46. Habitual slope stability issues compromise the south bound lanes at this location annually. The slope failures lead to road closures which impact the continuity of operations of emergency and essential personnel in the town.
- The following critical facilities are municipally owned and located in the special flood hazard area:
  - C180071 (Large Culvert)

C180095 (Large Culvert)

### 10.7.4 Proposed Hazard Mitigation Actions for the HMP Update

Fort Edward participated in the mitigation strategy workshop and identified hazard mitigation actions to reduce the risks and impacts of hazards the community ranked as high-risk. Hazard risk ranking was specific to each community in the County and was based on quantitative (i.e., analysis of the best available data) and qualitative risk assessment processes (i.e., evaluation of previous occurrences, likelihood of future occurrences and vulnerabilities to people and community services; buildings and critical infrastructure; the natural environment and other local priorities).

Implementation of these actions are dependent upon available funding (grants and local match availability) and local capacity and may be modified or omitted at any time based on the occurrence of new hazard events and changes in local priorities.

Volume I identifies fourteen evaluation criteria for prioritizing the mitigation actions. Below, Table W provides the prioritization criteria score for each proposed mitigation action.

Action 2025-FortEdwardT-01. Generators

| Description of the Problem:                | Town-owned facilities lack back-up power. These facilities are Town Hall and the new Highway Garage.                                                                                                      |                                                                                                                                                                 |
| Description of the Solution:               | The Town Supervisor will oversee the installation of generators and necessary electrical components to supply backup power to Town Hall and the new Highway Garage.                                       |                                                                                                                                                                 |
| Estimated Cost:                            | High                                                                                                                                                                                                      |                                                                                                                                                                 |

| Goals Met:                                 | 1,2,6,7                                                                                                                                                                                                   |                                                                                                                                                                 |
| Benefits:                                  | This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.                                                   |                                                                                                                                                                 |
| Impact on Socially Vulnerable Populations: | Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.               |                                                                                                                                                                 |
| Impact on Future Development:              | This action results in protection of a critical facility that could support future development.                                                                                                           |                                                                                                                                                                 |
| Impact on Critical Facilities/Lifelines:   | This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.                                                   |                                                                                                                                                                 |

|                                |                                                                                                                                                                                                                |                                                                                                                                                                                             |                                                                                                |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Impact on Capabilities:        | This action ensures continuity of operations to maintain capabilities.                                                                                                                                         |                                                                                                                                                                                             |                                                                                                |
| Climate Change Considerations: | Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events. |                                                                                                                                                                                             |                                                                                                |

| Description of the Problem:  | Roads have washed out due to natural hazards in the past including: <ul style="list-style-type: none"> <li>East Road.</li> </ul> When they wash out, roads are closed which prevent vehicles accessing those areas of the town. This impacts the health and safety of residents as it prevents emergency personnel from getting to those residents in the event of an emergency. |                                                                                                                                                      |  |
| Description of the Solution: | Improve drainage by increasing the culvert sizes at sites where roads have washed out due to natural hazards in the past to meet 50-year storm requirements and reduce flooding overflow at East Road. By improving these sites reduces the potential of roadway flooding and washouts, allowing emergency personnel full access to the town in the event of an emergency.       |                                                                                                                                                      |  |
| Estimated Cost:              | Medium                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                      |  |

|                                            |                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                             |                              |
|--------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| Benefits:                                  | Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.                                            |                                                                                                                                                                                             |                              |
| Impact on Socially Vulnerable Populations: | Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.                                                                                                                                                                                          |                                                                                                                                                                                             |                              |
| Impact on Future Development:              | Future development in the impacted area will be less likely to be flooded.                                                                                                                                                                                                                                                   |                                                                                                                                                                                             |                              |
| Impact on Critical Facilities/Lifelines:   | <ul style="list-style-type: none"> <li>• Transportation routes are more likely to remain open</li> <li>• Evacuation routes will remain intact.</li> </ul> <p>Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.</p> |                                                                                                                                                                                             |                              |
| Impact on Capabilities:                    | Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.                                                                                                                                                      |                                                                                                                                                                                             |                              |
| Climate Change Considerations:             | Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.                                                                                                                                         |                                                                                                                                                                                             |                              |

| Description of the Problem:                | Staff members have not been formally trained on Floodplain Administration; therefore, they may not fully understand floodplain management in the State, county and town.                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                  |                              |
| Description of the Solution:               | Send local Floodplain Administrator to County and State trainings and to complete certification programs with respect to floodplain management. Also provide continuing education and training to ensure code enforcement and proper inspections. Becoming certified in floodplain management lays the foundation for ensuring that highly qualified individuals are available to meet the challenge of breaking the damage cycle and stopping its negative drain on the nation's human, financial, and natural resources. |                                                                                                                                                                                  |                              |
| Estimated Cost:                            | Low                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                  |                              |

| Goals Met:                                 | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                  |                              |
| Benefits:                                  | This action will increase the NFIP capabilities of the Town and assure the Town's NFIP program has enough staff to accomplish its goals and reach NFIP compliance.                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                  |                              |
| Impact on Socially Vulnerable Populations: | Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.                                                                                                                                                                                                                                                           |                                                                                                                                                                                  |                              |
| Impact on Future Development:              | Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                  |                              |
| Impact on Critical Facilities/Lifelines:   | The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                  |                              |
| Impact on Capabilities:                    | This action will enhance the Town's current NFIP capabilities.                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                  |                              |
| Climate Change Considerations:             | Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will educate staff on NFIP regulations to assist with the flood hazard.                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                  |                              |

| Description of the Problem:                | At the time of this plan update, North River Road, East Road, and Woodward Road flooding during periods of rain and snow melt. It is uncertain as to what needs to be done to alleviate the flooding along these roadways. When flooded, the roads need to be closed, impacted the continuity of operations for emergency and essential personnel.             |                                                                                                                                                      |
| Description of the Solution:               | Evaluate North River Road, East Road, and Woodward Road for flooding issues. Identify solutions to alleviate flooding and address those solutions. By identifying floodprone areas, the Town can gain a better of understanding on ways to protect properties from flood damage. Once protected, this will reduce or eliminate the damages caused by flooding. |                                                                                                                                                      |
| Estimated Cost:                            | Medium                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                      |

| Benefits:                                  | This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.                                                                                                                                                      |                                                                                                                                                      |
| Impact on Socially Vulnerable Populations: | This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.                                                                                                                                                                                                                                     |                                                                                                                                                      |
| Impact on Future Development:              | Future development in the impacted area will be less likely to be flooded.                                                                                                                                                                                                                                                                                     |                                                                                                                                                      |
| Impact on Critical Facilities/Lifelines:   | This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.                                                                                                                                                      |                                                                                                                                                      |
| Impact on Capabilities:                    | Not applicable                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                      |
| Climate Change Considerations:             | A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.                                                                                                                                                                                                               |                                                                                                                                                      |

|                     |                                                                                                                                                                                    |                                            |                                                                                                                                                                                  |

| Description of the Problem:                | Slope failure at County Route 46. Habitual slope stability issues compromise the south bound lanes at this location annually. The slope failures lead to road closures which impacts the continuity of operations of emergency and essential personnel in the town.                                                                                                    |
| Description of the Solution:               | Stabilize slope at County Route 46 where south bound lanes are annually compromised. To do this, the town will use proper bank stabilization methods including planting vegetation on the slope and installing riprap. This project will reduce future losses to the roadway and hindrance to transportation system are greater than the cost to implement the project |
| Estimated Cost:                            | Medium                                                                                                                                                                                                                                                                                                                                                                 |
| Potential Funding Sources:                 | FEMA HMGP, Local Budget                                                                                                                                                                                                                                                                                                                                                |

| Goals Met:                                 | 1,2,4                                                                                                                                                                                                                                                                                                                                                                  |
| Benefits:                                  | This action will prevent erosion along County Route 46, protecting property and infrastructure from further impact.                                                                                                                                                                                                                                                    |
| Impact on Socially Vulnerable Populations: | This action will assist socially vulnerable populations whose properties are impacted by flooding from County Route 46. Furthermore, this action will assist in keeping roadways clear of flood waters for the populations which may need to attend medical appointments or require medical attention from first responders.                                           |
| Impact on Future Development:              | Future development in the impacted area will be less likely to be flooded.                                                                                                                                                                                                                                                                                             |

|                                          |                                                                                                                                                                                                                                              |                                                                                                                                                                                                        |                                                             |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Impact on Critical Facilities/Lifelines: | This action would assist in the reduction of roadway flooding from County Route 46, permitting first responders to traverse the roadways safely.                                                                                             |                                                                                                                                                                                                        |                                                             |
| Impact on Capabilities:                  | Not applicable                                                                                                                                                                                                                               |                                                                                                                                                                                                        |                                                             |
| Climate Change Considerations:           | A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. These periods of intense rain may lead to more instances of flooding and increased erosion. |                                                                                                                                                                                                        |                                                             |

| Description of the Problem:  | The following critical facilities are municipally owned and located in the special flood hazard area: <ul style="list-style-type: none"> <li>• C180071 (Large Culvert)</li> <li>• C180095 (Large Culvert)</li> </ul>                                                                                                                                                                                                                                      |                                                                                                                                           |
| Description of the Solution: | The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at Large Culverts: C180071 and C180095 to protect each to the 500-year flood level. Options include: <ul style="list-style-type: none"> <li>• Elevation of facility</li> <li>• Floodproofing of facility</li> <li>• Mobile flood barriers</li> </ul> Once the most cost-effective option is identified, the Town will carry out the option. |                                                                                                                                           |

| Benefits:                                  | Ensures continuity of operations.                                                                                                                                                                                                                                          |                                                                                                                                                                                             |                              |
| Impact on Socially Vulnerable Populations: | Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.                                                                                          |                                                                                                                                                                                             |                              |
| Impact on Future Development:              | The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area. |                                                                                                                                                                                             |                              |
| Impact on Critical Facilities/Lifelines:   | This action will protect Large Culverts: C180071 and C180095, and C180052 which is a critical facility, maintaining the critical services that it provides.                                                                                                                |                                                                                                                                                                                             |                              |
| Impact on Capabilities:                    | This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.                                                                  |                                                                                                                                                                                             |                              |
| Climate Change Considerations:             | This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.                                                                                                                 |                                                                                                                                                                                             |                              |

| Description of the Problem:                | Weight limits on bridges have been lowered; they are deteriorating yearly and fire trucks cannot cross some of the bridges which limits continuity of operations and inhibits emergency response.                                                                                                             |                                                                                                                                                                                             |                              |
| Description of the Solution:               | The Town will work with an engineer to identify the vulnerabilities of bridges across the town and will work with the engineer to discuss cost effective solutions for repair. Once the best and most cost-effective solution is decided, the Town will acquire the funding to implement the chosen solution. |                                                                                                                                                                                             |                              |
| Estimated Cost:                            | TBD after study                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                             |                              |

| Implementation Timeline:                   | 1-5 years                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                             |                              |
| Goals Met:                                 | 1,2,6,7                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                             |                              |
| Benefits:                                  | Bridges will remain in service and usable by all emergency vehicles, including the heavy fire trucks                                                                                                                                                                                                          |                                                                                                                                                                                             |                              |
| Impact on Socially Vulnerable Populations: | Protection and maintenance of existing bridges across the town that are essential for emergency responders during natural hazard events across the Town.                                                                                                                                                      |                                                                                                                                                                                             |                              |
| Impact on Future Development:              | The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.                                    |                                                                                                                                                                                             |                              |
| Impact on Critical Facilities/Lifelines:   | This action will protect critical bridges that are used by first responders as they render aid to the Town. .                                                                                                                                                                                                 |                                                                                                                                                                                             |                              |
| Impact on Capabilities:                    | This action improves continuity of operations during a emergency response as it maintains usable transportation routes via bridges                                                                                                                                                                            |                                                                                                                                                                                             |                              |
| Climate Change Considerations:             | This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.                                                                                                                                                    |                                                                                                                                                                                             |                              |

| Description of the Problem:                | <p>Water District 2 is located south of the Village, where there is growing interest among residents in obtaining water hookups. However, the Town did not qualify for the necessary funding or approvals to expand the district. The cost of extending water service to this area is prohibitively high, making expansion financially challenging.</p> <p>The remaining residents throughout the Town rely on private wells for their water supply. Many have expressed concerns about water quality, particularly due to elevated sulfur content and high levels of iron, which can affect both taste and usability.</p> |                                                                                                                                                      |
| Description of the Solution:               | The Town will establish a community Water Filling Station in a centralized location within or near District 2 where residents can access treated water. This would offer an interim solution for those with poor well water quality, especially during emergencies or dry seasons, while long-term funding and expansion plans are explored.                                                                                                                                                                                                                                                                               |                                                                                                                                                      |
| Estimated Cost:                            | TBD after study                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                      |

| Benefits:                                  | Additional water supply options for residents would help improve the quality of life while improving essential services and utilities to those who currently rely on private wells. It would also improve wildfire response capabilities                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                      |
| Impact on Socially Vulnerable Populations: | Socially vulnerable groups who rely on private wells would be afforded better, more reliable drinking water services and improved water supply if connected to District 2.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                      |
| Impact on Future Development:              | This action would promote areas of future development if prospective development sites knew their water services were connected to District 2.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                      |
| Impact on Critical Facilities/Lifelines:   | This action will further enhance wildfire fighting efforts along with                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                      |
| Impact on Capabilities:                    | This action improves the Town's wildfire fighting capabilities if a more reliable water source was used at some of these more isolated residences.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                      |

|                                |                                                                                                                                                                         |                                            |                                                                                                                                                                                                                                                                                                                                              |

|                                | No Action                                                                                                                                                               |                                            | -                                                                                                                                                                                                                                                                                                                                            |
|                                | Provide Water Quality Testing Kits to Residents                                                                                                                         |                                            | This low-cost alternative would empower residents to regularly test their private wells for contaminants like sulfur and iron. It promotes awareness and helps identify areas with the most severe water quality issues. However, its success relies on widespread and routine testing, as well as reporting back to the town, by residents. |
|                                |                                                                                                                                                                         |                                            |                                                                                                                                                                                                                                                                                                                                              |
